Price Lists on application. 10 per cent. Discount to Professionals. [1610

INTIMATIONS.

£1,000 STG. Payable at Age 55, or at death if previous (even if that event occurs during the first twelve months)—may be secured by a payment at the rate of—

£7	7	6	per quarter if commenced at age (n. b.)...20
£8	14	2	...25
£10	11	2	...30
£13	4	10	...35
£17	15	8	...40
£27	12	6	...45

AFTER the Policy has been three years in force—should the Policy-holder wish to discontinue future payments—he will be entitled to receive on application a Free Paid-up Policy for proportionate amount of the Sum Assured. For instance a man who had assured at 45, after five years' payments would be entitled to a Paid-up Policy for £500 free of future payments as explained in Prospectus.

Note.—It is an advantage to effect Provisions of this nature early in life. By delay the rate of subscription increases; Death may occur before the provision is effected, or Health may fail and render the life ineligible for Assurance.

NOTICE.

RULES OF THE HONGKONG SAVINGS BANK.

1.—The business of the above Bank will be conducted by the Hongkong and Shanghai Banking Corporation, on their premises in Hongkong. Business hours on week-days, 10 to 3; Saturdays, 10 to 1.

2.—Sums less than $1, or more than $250 at one time will not be received. No depositor may deposit more than $2,500 in any one year.

3.—Depositors in the Savings Bank having $100 or more at their credit may at their option transfer the same to the Hongkong and Shanghai Banking Corporation on fixed deposit for 12 months at 5 per cent. per annum interest.

4.—Interest at the rate of 3½ per cent. per annum will be allowed to Depositors on their daily balances.

5.—Each Depositor will be supplied gratis with a Pass-Book, which must be presented with each payment or withdrawal. Depositors must not make any entries themselves in their Pass-Books, but should send them to be written up at least twice a year, about the beginning of January and beginning of July.

6.—Correspondence as to the business of the Bank if marked ON HONGKONG SAVINGS BANK BUSINESS is forwarded free by the various British Post Offices in Hongkong and China.

7.—Withdrawals may be made on demand, but the personal attendance of the Depositor or his duly appointed Agent, and the production of his Pass-Book are necessary.

By Order of the Board,
N. J. EDE,
Secretary.
Hongkong, 28th September, 1889. |2037

THE SHARE LIST CLOSES AFTER THE ARRIVAL OF THE STEAMER *CLARA* FROM TONKIN.

THE HONGAY LIME AND CEMENT WORKS, LIMITED.

To be Incorporated under the Companies Ordinances 1864-1886.

CAPITAL $250,000
DIVIDED INTO 50,000 SHARES OF $5 EACH.

Payable, $1 on Application, $1 on Allotment. Balance as required, at one month's notice. One half of the Shares is held by the Directors and their friends and will be allotted in full; the remainder are now offered for Public Subscription in Tonkin and Hongkong.

The following is Mr. HAYLLAR'S Report on the Property to be purchased by the Company:—

26th September, 1889.

TO THE DIRECTORS OF THE HONGAY LIME AND CEMENT WORKS, LIMITED.

GENTLEMEN,—I beg to hand you my report on the proposed cement works at Hongay.

The original concession was 500 metres (1,640ft. 5in.) long and 500 metres (1,640ft. 5in.) wide; of this the owner proposes to sell to your company a piece 300 metres (984ft. 3in.) long and 500 metres (1,640ft. 5in.) wide, giving an area of nearly 150,000 square metres (1,514,580 square feet), of fairly level ground, with Kilns, Engine, Mill, Sheds, and all materials, reserving to himself the remainder.

The site is very well situated, with a sea frontage of 984ft. 3in., at the North end of Hongay Bay, opposite to the wharf of the Charbonnages du Tonquin. This bay is beautifully sheltered from all winds, has a good anchorage, and is deep enough for large steamers.

There is a plentiful supply of good and fresh water on the site, and further permission has been granted to construct a small dam and convert a valley to the North of the lot into a fresh-water Reservoir.

The cement is an artificial cement and is a heavy slow-setting one such as Portland cement, which it closely resembles; is of a good colour and weighs 420 lbs. to the cask. The tensile strain is high and the cement has already been extensively used in Haiphong for floors, concrete, bricks, pilasters, etc., and is giving very satisfaction, but as yet it has been only turned out in a very small quantity owing to lack of machinery, nor in such good quality as it is possible to make it, although during the last year improvements have taken place in the cement both in colour, tensile strength, and weight. With good machinery, proper and continuous supervision, I am convinced you will be able to turn out a very superior hydraulic cement, equal in every respect to the best Portland, and with the very great advantages you enjoy of good and easy transport, cheap labour, the close proximity of a good supply of coal, limestone & clay, and a plentiful supply of water you ought to turn it out at an exceptionally low rate.

The Clay is to be got from the banks of the river, the Limestone from the Limestone Islands, &c which surround the Bay; there is an inexhaustible supply of both of these materials which are of very good quality and very similar in their chemical constituents to the clays and limestone used in the best cement works in England, *i.e.* the Portland, Medway, and Thames Cement Companies.

The Coal required is also close at hand and after careful examination I find the Coal of the District eminently adapted to the burning of Cement.

The existing Machinery will have to be removed but it can be used for the manufacture of Bricks, and New Kilns, Engines, and Machinery will have to be erected, also a Pier of about 100 feet long to allow Steam-launches to discharge easily.

I calculate the cost of existing buildings and materials at the site at $12,000, but details of tests I am now making and the cost of erection of New Machinery I will forward you in a day or two.

Herewith Analysis of Three Cements and a Hydraulic Lime shewing comparative constituents of the Clay and Lime used in England and at Hongay.

	Portland Cement Heavy	Portland Cement Light	Hongay Cement	Hydraulic Lime
Carbonate of Lime	77.00	71.55	74.00	84.00
Carbonate of Magnesia	0.80	0.80	traces	15.00
Organic Matter	traces	0.80	1.20	0.00
Alumina	2.70	3.50	4.20	traces
Ferric Oxide	3.50	2.20	4.00	1.00
Silica	15.80	20.10	14.00	0.00
Alkalies	1.00	traces	traces	0.00

H. F. HAYLLAR, C.E.

Applications for shares must be made on the printed form, and forwarded to the Bankers, THE NEW ORIENTAL BANK CORPORATION, LIMITED, (where share forms may be obtained) together with the amount payable on application.
Hongkong, 30th September, 1889. |2048

A. S. WATSON & COMPANY, LIMITED.

ESTABLISHED A.D. 1841.

MANUFACTURERS OF AERATED WATERS.

OUR AERATED WATER MANUFACTORY is replete with the best Machinery, embodying all the latest improvements in the trade.

The greatest attention has been paid to appliances for ensuring purity in the Water supply, to secure which we have added a Condenser capable of supplying us with 3,000 gallons of distilled water a day, and are now in a position to compete in quality with the best English Makers. Our Sweet Waters cannot be surpassed anywhere.

The purest ingredients only are used, and the utmost care and cleanliness are exercised in the manufacture throughout.

FOR COAST PORTS, Waters are packed and placed on board ship at Hongkong prices, and the full amount allowed for Packages and Empties when received in good order.

Counterfoil Order Books supplied on application.

COAST PORT ORDERS.

whenever practicable, are despatched by first steamer leaving after receipt of order.

Our Registered Telegraphic Address is, "DISPENSARY, HONGKONG," And all signed messages addressed thus will receive prompt attention.

The following is a List of Waters always kept ready in Stock:—

PURE AERATED WATER
SODA WATER
LEMONADE
POTASH WATER
SELTZER WATER
LITHIA WATER
SARSAPARILLA WATER
TONIC WATER
GINGER ALE
GINGERADE.

☞ No Credit given for Bottles that look dirty, or greasy, or that appear to have been used for any other purpose than that of containing Aerated Water, as such Bottles are never used again by us.

WATSON'S
PURE FRUIT CORDIALS.
Prepared from the Juice of the finest selected Fresh Ripe Fruit.

RASPBERRY — BLACK CURRANT
STRAWBERRY — RED CURRANT
DAMSON — ORLEANS PLUM
PINE APPLE
MORELLA CHERRY
LIME FRUIT, &c.

A table-spoonful (more or less according to taste) added to a tumbler of plain or aerated water forms a delicious beverage. The addition of Wines or Spirits produce excellent and piquant results.

Price, 75 Cents per Bottle or $7.50 per dozen Case Assorted.

RASPBERRY SYRUP, STRAWBERRY SYRUP, RASPBERRY VINEGAR } Price, $1 per Bottle

For imparting a delicious flavour to AERATED WATERS, SUMMER DRINKS, &c., &c.

Sole Agents for Hongkong and China for MONTSERRAT LIME FRUIT JUICE AND CORDIALS,

A. S. WATSON & Co., LIMITED,
Hongkong, China, and Manila. [2—19

NOTICE TO CORRESPONDENTS.

Communications on Editorial matters should be addressed "The Editor," and those on business "The Manager," and not to individuals by name.

Correspondents are requested to forward their name and address with communications addressed to the Editor, not for publication, but as evidence of good faith.

All letters for publication should be written on one side of the paper only.

Advertisements and Subscriptions which are not ordered for a fixed period will be continued until countermanded.

Orders for extra copies of the *Daily Press* should be sent before 11 a.m. on the day of publication. After that hour the supply is limited.

TELEPHONE No. 12.

DEATH,

At Cathay Villa, Durham Road, Portobello, on the 23rd August, 1889, KATHERINE SHAW, aged 37 years, the beloved wife of JOHN MACDONALD, formerly of West Point, also their infant daughter AGNES RUTH, aged 37 hours. [2051

The Daily Press.

HONGKONG, OCTOBER 1st, 1889.

A QUESTION that excites at the present moment a good deal of natural interest is, Who will step into the place left vacant by the lamented death of the Hon. FREDERICK STEWART? The post of Colonial Secretary of Hongkong is an important office which has usually been filled by the transference to it from another colony of some experienced official. The appointment of the late Dr. STEWART to this post was somewhat exceptional, but he had, by acting in that capacity for at least four years at different times, established such a strong claim, and had so excellent a record besides, that the Downing Street authorities could not ignore it, supposing they had desired to confer the appointment on an outsider. The circumstances are now somewhat different. Of the possible candidates for this prize in the ranks of the existing officials none have acted as Colonial Secretary very recently, and none of them at any time except for very brief periods. They will, therefore, if the appointment be made from among the local officials, have to be taken on their merits. There are several who have, by length of service and experience of the Colony, strong claims to the post. Of these the Hon. ALFRED LISTER, Postmaster-General, the Hon. W. M. DEANE, Superintendent of Police, and the Hon. H. E. WODEHOUSE, Police Magistrate, Coroner, and Superintendent of the Fire Brigade, are the most conspicuous by reason of length of service, and they will probably all be candidates for the appointment. Mr. LISTER is expected to arrive here very shortly, being now on his way out, and Mr. DEANE will be leaving England in a few days. Mr. ACKROYD, Registrar of the Supreme Court, who is also about to return, may possibly also apply for the post, though he may safely be regarded as out of the running, his experience having been confined to the Law Courts. It is probable that Mr. LISTER stands the best chance of all these officials, that is, of course, supposing that he applied for it. Although not senior to Mr. DEANE in the service, he is greatly his senior in the Executive and Legislative Councils, and is more in the groove for promotion. This is of course more Mr. DEANE's misfortune than his fault. He was appointed to the post of Captain Superintendent of Police in 1868, a very good post for a young man, as he was then, and there he has been allowed to remain, having formed into an excellent policeman, though not, we believe, particularly enamoured of the duties. Near the close of Sir JOHN POPE HENNESSY's term of office he twice for a brief period acted as Colonial Secretary, but save when on one occasion in 1881 he was for a few months Acting Colonial Treasurer this has been Mr. DEANE's only experience since he was appointed to the Police. Mr. LISTER, on the other hand, has at one time or another filled posts in nearly all the public departments, and is familiar with their working. But a great deal depends upon whether the Colonial Office have an urgent unsatisfied claimant for promotion from another Colony clamouring for a long deferred appointment. In any case, however, the post is not likely to long remain vacant since the importance of its being filled is well recognised in Downing Street.

We are requested to state that there will be no concert at the Sailors' Home this (Tuesday) evening.

The Pacific Mail steamer *City of Sydney*, which leaves here on the 9th inst. for San Francisco, will call in at Kobe.

We note by a London telegram in Indian papers that the P. & O. steamer *Arcadia* was discharging at Southampton on the 5th September.

The Agents (Messrs. Adamson, Bell & Co.) inform us that the Shire Line steamer *Glamorganshire*, from London, left Singapore for this port on Sunday.

According to the return of the Curator of the City Hall Museum, 176 Europeans and 2,018 Chinese visited that institution during the week ended 29th September.

Kuhlow says that His Majesty the Emperor has nominated Vice-Consul Feindel, hitherto administrator of the German consulate at Tientsin, to be Imperial German Consul at Amoy.

As was anticipated, the September settlements in the share market have not passed off altogether satisfactorily, but the trouble was discounted in the previous month's collapse, and yesterday's difficulties were consequently no surprise.

We understand that no arrangements for the Acting Colonial Secretaryship will be made at present, nor in all probability until the arrival of the Hon. A. Lister, a week hence. The work will in the meantime be carried on by the Departmental staff.

Yesterday at the Police Court before Mr. Robinson, a contractor named Tai Ting Yune was fined $20 with the alternative of six weeks' imprisonment for blasting stone above Plantation-road, whereby large pieces of stone were projected on to the high road to the danger of passers-by.

Among the details of the great strike in London we find the *Kaiowo* with 4,000 tons of cargo remained in dock with only 100 moved; the *Dardanus* in a week unloaded 200 tons out of 4,000; the *Aberdeen* took a week to discharge 150 out of 5,000 tons, the *Ulysses* only worked 100 tons in ten days.

To the Singapore version of the Reuter's telegram announcing that a stringent convention has been signed in London between England and Italy for the suppression of the slave trade and the treatment henceforth of slavers as pirates there is the following addition:—"The Mediterranean is alone excepted from the operation of the convention."

According to the *Times* the scientific expedition of Colonel Pevtsoff to Thibet has been stopped by the Chinese authorities in Kashgar, on the pretext that the Colonel's passport, which is in the name of his predecessor, General Prjevalsky, is not in order. The Chinese gave the expedition free passage across the frontier, but have arrested its progress in Kashgar.

In the *Guardian* of the 14th August there is a notice of the marriage, which took place at St. Giles's, Oxford, on the 8th idem, of Bishop Scott of North China to Frances Emily, daughter of Captain Montagu Burrows, Chichele Professor of Modern History. Bishop and Mrs. Scott were to leave London on the 19th September for Shanghai by the P. & O. steamer *Shannon*.

The Band of the A. & S. Highlanders will play the following programme at the Officers' Mess this (Tuesday) evening, commencing at 6.30 p.m.:—

Grand March	"Silver Trumpets"	Viviani.
Valse	"The river of years"	Liddell.
Selection	"Dorothy"	Cellier.
Cavatina from Fausta (Clarionet solo)	"Ah! se d' Amor"	Donizetti.
Selection	"The Pirates of Penzance"	Sullivan.

The report on the trade of 1888 by the British Consul-General at Bushire, Persia, states:—The opium crop of Central Persia was an average one, the London market being stagnant throughout the year. The bulk of the 1888 crop was shipped to Hongkong, where in July and August a marked advance in prices occurred, and the early shipments returned good profits. Later in the year large shipments of the drug from India lowered prices in China.

The *Straits Independent* says that the opium-smuggling into the Colony, which has resulted in the Government offering a very high reward for the discovery of the guilty parties, is artfully carried on. The smugglers regularly import twice a month contraband opium from China, which finds sale here below the Farmer's rates. The injury to the latter and to the revenue is obvious enough. The smugglers go to work in such a wily and crafty manner as to baffle detection so far.

The following "taradiddle" is from the *Pall Mall Gazette*:—"A sudden demand for bronze-coloured hair perplexes the worthy coiffeurs of Paris just now. But as the demand must produce or create the supply, an enterprising merchant in capillary wares sent to China while the craze was still young, and the result is that bales of copper-coloured hair, long and short, straight and curled, has arrived at Marseilles, and the humblest grisette can now shave and be happy—that is, invest in a bronze-coloured wig of Chinese origin."—It would puzzle any one to find bronze-coloured hair in China.

The *Deli Courant* says that coolie emigration from China to Deli continues to work smoothly, and gives rise to no serious difficulties. But the supply does not yet come up to the demand, owing perhaps to the time of year when harvest operations are in full swing in China. On the 4th September one steamer alone brought 102 coolies. Three days afterwards the same steamer returned to China with 89 time-expired coolies. They carried their savings in the form of cheques on accredited parties in China, payable only on arrival there. These precautions for the welfare of the coolies will undoubtedly give Deli a good name among the labouring class there.

In Java, says the *Straits Times*, the native population has been so rapidly increasing during the present century that the danger of over-population becomes imminent. Mr. R. A. Eekhout, in a pamphlet, has raised an alarm by showing that the population estimated at 21,000,000 in 1885, doubles in 39 years, so that there is every prospect of the figure reaching 41 millions in 1923. The high mortality among children on the island owing to neglect only, prevents the increase from being still more remarkable. To safeguard against the peril of over-population, Mr. Eekhout would have State-aided emigration from the island to other parts of the Archipelago where waste land abounds.

The *Mercury* says:—A holiday party of well known ladies and gentlemen from Shanghai recently had an ugly accident in Japan, caused by a suspension bridge, which they were crossing, snapping, owing to the frolics of some Japanese girls who playfully set it swinging. One of the ladies who was riding in a chair had a narrow escape of being drowned in the fierce little mountain torrent which the bridge spanned, and which was four or five feet deep. She was, however, gallantly rescued by the chair coolies, assisted by one of the gentlemen of the party, who, however, suffered somewhat severely from his immersion. The conduct of the Japanese coolies on this occasion is a marked and pleasing contrast to that of the railway officials on the Kobe-Yokohama line in the recent accident. A telegram has been received stating that all the members of the party are now recovered from the effects of their misadventure, which might have ended very seriously.

At the British Summary Civil Court at Shanghai a Portuguese named Campos, living in Boone Road, Hongkew, summoned a neighbour, a youth named McCarthy, for shooting the complainant's cat. The defendant admitted the charge, but stated that he shot the cat in consequence of seeing it kill two of his pigeons on his back premises. He had lost six out of eight valuable pigeons through the depredations of cats. The Assistant Judge said he believed defendant's statement, but that was no justification for shooting the cat. The offence was punishable by imprisonment for as long as six months, or by a fine as great as £20; and had there been anything like wanton cruelty in this case he should have dealt severely with the defendant. A fine of $5 and costs was imposed.—*N. C. Daily News.*

The sale of the lot of land on Kennedy Road, East of the Tramway, took place yesterday afternoon, Mr. R. F. Drury, of the Public Works Department, officiating as auctioneer. The lot, which contains 25,995 feet, was put up at $5,199, the annual rent being $120. It was bought by the Rev. Dr. Chalmers, on behalf of the Union Church, at $10 advance on the upset price. The site is next to the Tramway, on the eastern side, and is large enough for the erection of the new Church and beyond, to the east, of a parsonage. The plans for the new building have been taken from the present structure with two or three unimportant alterations, and the addition of a vestry, which the old church does not possess. The estimated cost of the new church is only $15,000, the contractor using the old material, or as much of it as is practicable.

On the 23rd September, before Mr. Justice Wood, in the Supreme Court, at Singapore, in the matter of the Rawang Tin Mining Company, (Limited), Mr. J. G. Davidson moved that the winding up petition be granted. The winding up petition set forth the name of the Company, and that it is registered in Singapore, and the objects for which the company was established. The company was indebted in the sum of $42,896 for money advances, and the company was unable to pay its debts. There was no opposition; therefore it was not necessary for Mr. Davidson to go further than to move. His Lordship to grant the order and prayer of petition for winding up the company, and to ask that Mr. Hornby, the Provisional Liquidator, be appointed Official Liquidator. Mr. Nanson, on behalf of the company, concurred in the application.

In the House of Commons, on the 27th August, Sir G. Baden-Powell asked whether the Postmaster-General could state in round numbers the quantities of mail matter despatched from this country to Hong Kong, Shanghai, other Chinese ports, and Japan respectively; and the routes by which the respective quantities were despatched. —Sir H. Maxwell: The weight of mails despatched by the respective routes may be taken approximately as follows:—By Suez Canal weekly—for Hong Kong, letters 100lb., printed matter, &c., 1,040lb.; for Shanghai, letters 70lb., printed matter, &c., 600lb.; for other ports of China, letters 14lb., printed matter, &c., 150lb.; for Japan, letters 43lb., printed matter, &c., 800lb. By San Francisco weekly—for China, letters 4lb., printed matter, &c., 30lb.; for Japan, letters 25lb., printed matter, &c., 150lb. By Canadian-Pacific route fortnightly—for China, letters 21lb., printed matter, &c., 30lb.; for Japan, letters 10lb., printed matter, &c., 70lb.

The *Straits Times* says that the following snake story from Penang has been sent to it by one Captain Marsh. From it our readers will see how injudicious it is to be abroad at two o'clock in the morning:—"I had been for a walk in the country, and lost my way, and so about two o'clock in the morning I sat down under a tree to have a rest, and dropped off into a light sleep. Waking up, to my horror I saw a huge boa-constrictor, about 25 feet long, coming down the tree. He came down with lightning speed, and before I had time to get out of the way he had a turn of his body round my neck and two round my right leg. Fortunately I always carry a bowie knife about with me at night time, and I had just time to cut him in half as he began to squeeze. I need not say that I released myself and got on to the road as quickly as I could; and there I swooned, and was picked up in the morning by a gharry and taken to the General Hospital, where I remained for sixteen days."

An interesting little sketch of "A Tour on the Thibetan Borders," by Mrs. C. Polhill-Turner, in the September number of *China's Millions*, affords another illustration of the extraordinary fear with which the Chinese regard the Thibetans. On the 9th April the writer and her party left for Hsiala-kn-t'so, a boundary of China Proper. Beyond that—she says—there are no villages, only black tents, in which the "black Thibetans" live. No Chinese are allowed to pass this place without a written pass from the Governor of Kokonor, and as our passport only goes as far as Kaunsih, much as we would like to have gone on to Kokonor, we could not do so. The Chinese are awfully afraid of the Thibetans. We suggested going on to Kokonor to our men. He was almost transfixed with horror, and when he did speak it was to say, "But we have no gun or sword." I laughed, and asked him did he want us to kill people? but he was far too serious for joking. In the little place we stopped at there were no provisions to be got, either for man or beast, and our coolie thought it accordingly a very bad place, though he was highly delighted at the reception we had there.

We (Mercury) are informed upon excellent authority that the work of extending the Tientsin railway towards the Capital will be actively begun in the coming winter, and that the undertaking, in accordance with the expressed wish of the Emperor, will be pushed forward as rapidly as possible. A beginning will be made as soon as a quantity of plant which has been ordered in Europe arrives, but it will not be allowed to interfere with the execution of the Hankow-Peking line, in connection with which, we believe, Li Hung-chang will have most of the financing to do. There is every reason to believe that a very large loan will shortly be placed on the market in connection with this scheme, as soon as the Palace loan which is being hawked about Peking and Tientsin (having been refused in many quarters owing to the conditions), is concluded. The difficulty about this loan is that the Chinese authorities want to get it in a back stairs sort of way, without the issue of an Imperial Edict, and also that they want the loans in silver, which considering the present state of the market, those who could otherwise lend, do not consider a desirable condition.

We take the following items from the *London and China Express* of the 30th August:—

A number of young Chinese gentlemen, with ages varying from nineteen to thirty-one years, are at present located at Essen. They are scholars of the artillery school at Tientsin, and lieutenants in the Chinese army. They will reside in Germany for eight months, instructed by Colonel Schnell, their tutor at Tientsin. The object of the visit to Essen is to acquire some practical knowledge of what they have already acquired theoretically. Accordingly they will be shown the various processes of iron and steel manufactures, and the methods of manufacturing powder, guns, and small arms. They will witness gun firing at the Krupp shooting-place near Meppen. They are also expected to take part in the autumn army manœuvres. Last week the Eastern visitors handed to Mr. and Mrs. Krupp the gifts of the First Ruler of China, which they brought over with them.

Ah Chuan, cook on board the steamship *Moqui*, lying in the Millwall Docks, was charged with concealing 23¼ lbs. of foreign manufactured tobacco, and 19 lbs. 10 oz. of cigars, with intent to defraud Her Majesty's Customs, he having thereby made himself liable to forfeit the sum of £37 1s., the treble value and duty, for which sum the Commissioners of Customs had elected to sue: and Took Loom, 37, second cook on the same vessel, was charged with attempting to smuggle 19 lbs. of tobacco and 9 lbs. 4 oz. of cigars, thereby rendering himself liable to forfeit the sum of £40 14s. 6d., the treble value and duty. On the 23rd inst. Mr. Gilbert, an officer of customs, boarded the vessel, and prisoners were questioned as to whether they had any tobacco or cigars: they replied they had not, but on the galley being searched the tobacco and cigars were found. They were concealed in various parts of the galley, some of them being in an iron pot under some rice, and some in the oven. Defendants each picked out the tobacco and cigars belonging to them, and they were then charged. The two stewards of the vessel had already been convicted of smuggling a large quantity of tobacco, and heavily fined.—Mr. Ogle, who defended, said the defendant secreted the tobacco and cigars for the chief steward. Defendants did not think they were doing wrong.—Mr. Lushington fined Ah Chuan £37 1s., or two months' imprisonment, and the other prisoner £40 14s. 6d., or six weeks'.

We understand that the Archbishop of Canterbury has selected the Rev. Charles John Corfe, M.A., Chaplain of H.M.'s Dockyard, Portsmouth, as Bishop for Korea, and has applied to the Admiralty to allow Mr. Corfe to relinquish his present position in H.M.'s service. The Bishopric is at present without endowment, but the Bishop will have the use of certain funds which have been provided by the Society for the Propagation of the Gospel.

The Naval Aide-de-Campship to the Queen, vacant by the promotion to flag rank of Captain Henry C. St. John, has been awarded to Captain Richard D. King, who was midshipman of the *Surprise* at the blockade of the Canton River and bombardment and capture of Canton; he carried the colours of the landing party at the assault and capture of the Peiho Forts, receiving the Chinese medal, Canton and Taku clasps, and assisted in piratical action at the Island of Lin Tin, near Hongkong, when a 5-gun battery and 25 large war-junks were captured.

The death is announced of the Rev. Samuel Beal, D.C.L., the distinguished Oriental scholar, and Professor of Chinese in the London University. Dr. Beal was born in 1825, and was educated at Trinity College, Cambridge, where he graduated in 1847, being made Hon. D.C.L. of Durham in 1885. He took priest's orders, and was appointed a chaplain in the Royal Navy in 1852. Placed on the retired list in 1887, he became rector at Greens-Norton, Towcester, in 1888. After holding several curacies and various clerical appointments in the Navy in the earlier portion of his career, he was rector of Falstone, Northumberland, 1877-80, and rector of Wark-on-Tyne, 1880-87. He was appointed Professor of Chinese in University College, London, in 1877. Dr. Beal was the author of "Travels of Buddhist Pilgrims," from the Chinese, 1869; "Catena of Buddhist Scriptures," from the Chinese, 1872; "Romantic Legend of Buddha," 1875; Five Lectures delivered at University College, London," 1876; "Dhamma Pada, or texts from the Buddhist Canon," 1878; "Sacred Books of the East," published by the Clarendon Press, Oxford; "Buddhism in China," issued in the non-Christian series of the Society for Promoting Christian Knowledge, 1881; and "Records of the Western World," an important work published in Trübner's Oriental series, 1881.

LATEST TELEGRAMS.

[FROM "STRAITS TIMES."]

LONDON, 20th September.

THE NETHERLANDS INDIES.

The Budget for the Netherlands Indies shows an Estimated Expenditure of 140,500,000 guilders, and a deficit of 14,400,000 guilders.

The Government sales of Coffee are estimated at 460,000 piculs. Bills are announced for the construction of a cable between Macassar and Bandjermassin, for the strengthening of the Naval resources, and for the construction of a Railway.

[The Netherlands India Budget has for years shown a chronic deficit, indeed ever since the Achsen war came into full swing. The colony has reached the limits of its taxable resources, and loans have had in consequence to be resorted to. Coffee sales have long been a mainstay of the revenue, and the yield may be expected to be heavy with a rising market. The cable referred to has for years been under discussion, and possesses both political and commercial advantages. The N. I. Navy stands sorely in need of better ships to render the Achsen blockade effective. The railway probably means one now under construction on the West Coast of Sumatra, from the seaboard inland, to tap extensive coal fields on the Ombilien River.—ED. *S. T.*]

SERVIA AND MONTENEGRO.

Private negotiations are proceeding for an alliance, defensive and offensive, between Servia and Montenegro.

LONDON, 21st September.

HOME RULERS ON THE STUMP.

Lady Sandhurst and the Right Hon. James Stansfeld, who are touring Ireland in the interests of Home Rule, have received the Freedom of the City of Dublin.

THE FUNERAL OF THE HON. F. STEWART, LL.D.

The funeral of the late Hon. F. Stewart, Colonial Secretary, took place yesterday morning, at the Protestant Cemetery, Wong-neichong. The cortège left the deceased gentleman's residence in Arbuthnot Road at a quarter to eight o'clock and arrived at the Cemetery shortly before nine. The Central School boys joined the procession at the house, and at the Monument the Police and Gaol Guard fell in. Beyond this there was no formal marshalling of the procession. The chief mourner was Mr. J. M. Gutierres. His Excellency the Governor, Sir William Des Vœux, was present in person, attended by his Aide-de-camp and Private Secretary; and there were also present Mr. Fielding Clarke, Acting Chief Justice; Colonel Craster, R.A., the Officer commanding the Troops, and staff officers; Commodore Church, R.N., and a number of Naval officers; Hon. A. J. Leach, Acting Attorney-General; Hon. H. E. Wodehouse, C.M.G., Acting Colonial Treasurer; Hon. S. Brown, Surveyor-General; Hon. N. G. Mitchell-Innes, Acting Registrar-General; Hon. P. Ryrie, Hon. Wong Shing, Hon. C. P. Chater, Hon. B. Layton, Hon. J. J. Keswick, Mr. A. Seth (Clerk of Councils), Mr. A. G. Wise, Acting Police Judge, and nearly all the heads of departments and other officials, M. Vissavous, Acting Consul for France, Mr. A. G. Romano, Consul-General for Portugal and Consul for Brazil; Rev. Father Burghignoli; Rev. Father Lemonier; and a large number of the general public including quite a host of Chinese, amongst whom were many of the deceased's old scholars. The service was conducted by the Right Rev. Bishop Burdon and the Rev. W. Jennings, Colonial Chaplain. The inscription on the coffin plate was as follows:—"The Hon'ble Frederick Stewart, LL.D.; aged 51; died 29th September, 1889." The coffin was covered with wreaths sent by His Excellency the Governor, Mr. M. Gutierres, Mr. Wodehouse, Mr. C. Ford, and others who did not attach their cards. We hear that owing to no large scale on which Dr. Stewart indulged in charity—but so unobtrusively that few knew of it until after his death—his estate will realise a comparatively small sum.

THE FATAL ACCIDENT IN UPPER STATION STREET.

An enquiry was held at the Magistracy yesterday afternoon by Hon. H. E. Wodehouse touching the death of two women and two children who were killed on the 20th September by the fall of the cookhouses at Nos. 22 and 24 Upper Station Street.

Kwok Pak Sing, trader, said.—I live on the second floor of No. 24 Upper Station Street. I knew one of the deceased, named Kwok Tai Yung. She was my niece. Her age was about 13 years. She lived with me. I was in the house when the accident occurred. On the 20th September about daylight—I was asleep in my room. My niece was sleeping in the sitting room. Suddenly I heard a part of the building fall. I ran downstairs. I knew another of the deceased, a woman about fifty years of age. The noise I heard was caused by the falling of one of the walls of the house.

Francis Alfred Cooper, Inspector of Buildings, said—I visited Nos. 22 and 24 Upper Station Street on the 25th September. I found that the rear wall of the two houses had almost completely fallen away. The houses were adjoining. They are three storeyed houses of the usual Chinese construction, consisting of a large room in the front, partitioned off into smaller ones and cookhouses behind, on each floor. The rear wall had fallen out very nearly from top to bottom. I am of opinion that the top floor of one of the cook houses must have given way first and this brought down the top floor in the other house. I examined the planking that had fallen and found the ends were very much decayed. I did not notice any particularly faulty construction in the place. The mortar used appeared to be about up to the average. There was very little bonding in the walls throughout the building. The joists were strong enough for the ordinary purposes of a cookhouse, and I think the collapse must have been caused by the floors being put to some other use than that for which they were intended. From what I saw I do not think I should have condemned the cookhouses. The portion of the houses left standing is not safe for occupancy in my opinion. There are a few persons still living there. I have not reported this. It is not my duty to do so.

His Worship—Is it not the duty of the Survey Department to warn the inhabitants?

Witness—No, I have only to report if there is any danger to public safety, and to see to the proper shoring up of the building.

His Worship—But if the houses fall down that will endanger public safety?

Witness—I do not think they will fall down. The floors may give way.

His Worship—Will not that bring down the walls as in the present case?

Witness—No, I think not from the present condition. They have not enough weight for that.

Kwok Pak Sing, recalled, said—Of the people who were living in the house two of them are missing, my niece and a woman. The part that fell down on my floor was used as a cook house. It was not used for any other purpose. I know nothing about the other floor. I cannot say which floor gave way first. I do not know how my niece or the other woman met with their death. They were sleeping in the sitting room, but they may have gone into the cookhouse for something.

Mong Ayu, prostitute, living at No. 22, Upper Station Street, said—I occupy a back room on the second floor. On the morning of the 20th I was sleeping in the cookhouse. I was awakened by the floor falling through and I fell into the next floor. I was badly hurt. My mother was occupying the same room. She fell also. She died of her injuries. I know nothing of the people on the ground floor. I did not hear anything about the next house coming down.

Inspector Hennessy said—On the morning of the 20th September about 5.30 a.m. a report was made at the Central Station that the cookhouses of Nos. 22 and 24 had fallen down. A party of police under Sergeant Hanna were sent to the spot. Three women were recovered and sent to the Government Civil Hospital. Three dead bodies were also taken out; one of an old woman about eighty, another of a girl about twelve, and one of a child about three months. One of the women sent to the hospital has since died. I have made enquiries but cannot find any reason for the falling of the cookhouses. I visited No. 22 last night and there are some people still living there. From what Mr. Cooper has said I think it would be advisable if they were directed to move out.

His Worship found that deceased met with their death by the collapse of the cookhouses of Nos. 22 and 24 Upper Station Street, and directed Inspector Hennessy to warn the tenants of No. 22 that the building was unsafe for habitation.

THE PEAK DRAINAGE AND WATER SUPPLY.

HONGKONG, 16th September, 1889.

EDWIN MACKINTOSH, Esq.,
Chairman of the Meeting of the Peak Residents, held at the City Hall, 16th August, 1889.

DEAR SIR,—Having been requested by the above meeting for my opinion on the question of the drainage and water supply to the Peak, I beg to report as follows:—

DRAINAGE.

There are at present at the Peak four drains leading to four different outfalls and constructed on what is known as the "Separate System."

The object of these four drains is evidently to carry away the sullage waters chiefly from houses within the Pokfulam reservoir drainage area and conduct it by pipe drains to certain points of outfall without this area.

Commencing from the westward—

No. 1 drain begins by "The Hut" following the Peak Road east to the Umbrella Seat, where it turns to the north and discharges on the hill-side over the city. To this drain only one house is as yet connected.

No. 2 drain begins by the Gap Police Station, following the Peak Road east to Victoria Gap, where it turns to the north and discharges on the hill-side over the city, a little way down the Peak Road. To this drain only one house is connected.

No. 3 drain has two branches, one commencing from "Hirst's Bungalow" and following Plantation Road, the other commencing at "The Pavilions" and running west on the Mount Kellett Road, joining at the north-east corner of R. L. No. 69, and thence following the Aberdeen Road to an outfall on the hill-side below "The Nook." This drain has thirteen houses connected to it.

No. 4 drain commences at "Myrtle Bank" and follows the Mount Kellett Road south-west for a short distance, when it turns east to an outfall on the hill-side close to No. 3 outfall. To this drain there are seven houses connected.

It will thus be seen that only 22 houses out of the 60 at present built and occupied are connected to these drains, and that there still remain 5 houses which drain into Pokfulam reservoir.

The drainage of the Peak may therefore be considered in its infancy, and if with only 22 houses drained a nuisance is caused, this nuisance will be greatly increased when the whole Peak, with its 100 houses either built or in course of construction, are drained, to say nothing of a probable considerable addition to the number of houses in the course of a few years. These figures do not include Magazine Gap, which has 9 houses built and about 40 more likely to be built before long.

I have heard it argued that the nuisance complained of will cease when more houses are connected. With this I do not agree, as the houses at the Peak are so scattered that the greater the number drained, the more additional long lengths of drains will be required, with only a few houses connected to each and a continuous and rapid flow will not be maintained.

It has been attempted to remedy this defect by the construction of what are known as "Field's Flushing Tanks." The action of these tanks, is that they accumulate the drainage as it comes dribbling in till the tank is full, and then by a syphon arrangement the whole contents of the tank is discharged in a few seconds, thus causing a good flush to the drain. It is generally allowed that these flushing tanks are the most efficient of their kind.

They have been very properly put at the upper ends of the four drains. Their capacity is 130 gallons, and they are supplied by the sullage waters of one house only.

This is a very weak point, for not only is their discharge too seldom, thus permitting the sullage to decompose before it is discharged, but they are liable to total inaction in the event of the house which supplies them becoming unoccupied, and from that moment the drain would cease to receive any flushing unless the tank were hand filled.

As an instance of this I may mention that one of these tanks is dependent upon "The Pavilions," which are seldom or never occupied during the winter, and therefore the drain remains unflushed for months, which cannot fail to cause a nuisance.

In a climate like this, I consider every drain should be flushed twice a day to keep it sweet, and this can only be properly effected by a constant water supply to each flushing tank, with a cock so arranged that the tank will be filled and the drain flushed twice daily independent of any supply of house sullage.

I may as well here state that I consider the "Separate System" of drainage the most suitable for the Peak, though there are several details in the manner in which it has been carried out that in my opinion admit of improvement, and it is upon these details that its efficiency depends.

I consider it was unwise to lay these drains till a proper water supply had been provided, and the two schemes should have been carried out together, but at the same time it was very important to take steps to prevent the Pokfulam water supply from becoming polluted.

The first and imperative necessity to improve the condition of the drains is a constant water supply.

I do not consider the lines taken by the present drains are in all cases the best.

The two drains Nos. 1 and 2 which discharge over the city should, I think, have been connected by carrying on No. 1 drain from the point at which it turns out at the Umbrella Seat till it connects to the commencement of No. 2 drain at the Gap Police Station. Had this been done in the first instance the long length from the Umbrella Seat to the outfall would have nearly sufficed to connect the two drains.

I see nothing for it but to carry on the present outfall to No. 2 drain by continuing it down the hillside till it connects to the town drain, which is carried up nearly as far as the first resting place on the Peak Road. This outfall is already causing a nuisance, and when the two large hotels now in course of construction are connected, it would very soon become dangerous.

The direction of the branch drain from "The Pavilions" (looking at the position of the outfall) is I consider wrong, and should run in the opposite direction.

The outfalls to No. 3 and 4 drains should be connected and carried considerably further down the hill, or else they will very soon cause such a nuisance as to become dangerous to the occupants of the houses in the neighbourhood.

The present stone ventilator covers, with nine 1¼ inch diameter holes, which are so liable to become stopped up, should be replaced by iron gratings of larger ventilating area. I have counted as many as four of the present ventilators in succession without a single hole that is not stopped, thus concentrating the sewer gases and causing a nuisance.

These ventilators might often be put a little removed from the public road, but if the drain is properly flushed and ventilated it is a well-known fact that no nuisance would arise that can be complained of or that will be in any way injurious to health.

I will not attempt in this report to enter into the question of the drainage of the large majority of houses at the Peak that have at present no system of drains with which to connect.

The drainage question of the Peak cannot be considered without reference to the disposal of the excrementitious matter and kitchen refuse, which are at present supposed to be removed by hand and the former carried down to boats in the harbour, but only a very small portion of which there is every reason to believe ever reaches its proper destination, and no system involving such a vast amount of manual labour will be found to work satisfactorily, especially when it has to be carried out at night and by so careless and indifferent a race as the Chinese coolie.

Burning the kitchen refuse has been tried, but in the absence of any official data, and seeing it has been discontinued, I should say it was a failure, as it is not combustible by itself and during the rainy season must be perfectly sodden.

The best means of disposing of these two forms of refuse from the Peak are not very easy to decide.

I have attempted to invent some form of bucket which should be locked and so constructed that while admitting of excrementitious matter being put in, should prevent any being got out till the lid was unlocked. While it is possible to design a bucket which nearly conforms to this in theory, yet in practice I am confident it would not be found to work.

The best way, and the one which I recommend, is to lay a small cast iron pipe (say 4 inches diameter) from a suitable and central position at the Peak and carry it down to an outfall on the South side of the Island, discharging either direct into the sea, or into a tank from which it could be run direct into the night-soil boats, which would be only too ready to take it away for manural purposes and would probably be found to pay a considerable sum for it if put on board free in this manner.

This plan would minimise the labour, and it seems to me to be absurd to attempt to enforce a system which necessitates its being carried all the way down when the same object can be effected by gravitation.

A small chamber could be built at the top end and put in charge of an overseer who would know the coolies, and by dividing the Peak into districts and keeping a record of the number of buckets, he would soon be able to judge very nearly if each coolie was doing his work. The chamber could, by proper ventilation and a good flushing every morning after each night's work, be so constructed, that I am confident no nuisance would arise.

Another way to dispose of this refuse would be to have proper pits dug at well-selected places, in which the matter could be deposited, and every morning after the night's removal a layer of soil deposited over it. After a pit is nearly full, several feet of soil could be placed over it and the ground turfed and planted with trees. While I believe this plan would be found to work satisfactorily, if properly carried out, I am decidedly of opinion that my previous plan will be found to be the better.

As regards the disposal of the kitchen refuse I am certainly of opinion that this last plan is the best and will be found to work better than either attempting to burn it or carry it away long distances by hand.

WATER.

In considering a Water Supply to the Peak three main points must be complied with.

1.—The water must be good.

2.—It must be sufficient in quantity not only for present requirements but for those of many years to come.

3.—It must be delivered at an altitude to supply all but say two or three of the highest houses at the Peak.

Before discussing which is the best plan to fulfil these requirements it will be well to settle No. 2 and 3, i.e., the amount and altitude.

The number of Europeans living at the Peak this summer is 226, and the number of Chinese 1,025, occupying 68 houses.

The estimated number of Europeans next summer will be 300 and Chinese 1,300, living in 88 houses.

The estimated number of Europeans in the summer of 1891 will be 425, and Chinese 1,800, living in 100 houses.

After this date I am inclined to think the increase in the population at the Peak will be slow, and a water supply that will provide for a population of 100 per cent. over the estimated numbers for 1891 would, I consider, be ample.

These figures do not include Magazine Gap, nor the Chinese occupied in building operations; but, as will be seen presently, the scheme I am about to recommend will be ample for both, and the latter will be reduced to very small numbers after the buildings now in course of construction are completed.

I consider, therefore, that whatever scheme is adopted should be able to supply water (or to be so extended as to be capable of supplying water) for not less than 350 Europeans and 3,000 Chinese.

It will be noticed that the number of Chinese does not increase in proportion to the Europeans. This is only natural, as, with Hotels, cheaper houses and the Tramway, the proportion of servants to Europeans will be less and has been getting so for several years.

If 20 gallons per head is allowed for every European and 10 gallons per head for every Chinese, I am sure it will be over the amount used in actual working.

This would make a daily consumption in 1891 of 26,500 gallons, and allowing for the increase of 100 per cent. on the European population and their proportion of servants as above, would make 47,000 gallons per day.

The next question to decide is the altitude. Having caused careful levels to be taken and assuming the Victoria Gap to be 1,300 feet above the sea, I consider the service tank should be at a level of 1,560 feet.

My reasons for fixing on this level are that there are only about four houses above it;—that the level of "Plunkett's Gap" is 1,440 feet and "Jackson's Gap" 1,510 feet

THE ENGLISH MAIL.

The P. & O. steamer *Peshawur*, with the English mail, of the 30th August, arrived here yesterday morning. The appended telegrams are taken from Ceylon and Indian papers:—

AN M.P. KILLED BY A FALL FROM HIS HO SE.

LONDON, 11th September.

A vacancy has occurred in the representation of Peterborough City by the death of the Liberal Unionist member, the Hon. W. J. Wentworth-Fitzwilliam, who was killed by a fall from his horse.

THE VACANCY AT DUNDEE.

LONDON, 13th September.

Mr. Burns, the Socialist, has withdrawn from his candidacy for Dundee in favour of Mr. Long of the *Dundee Advertiser*.

FORTH AND CLYDE CANAL.

LONDON, 12th September.

A scheme for the construction of a Canal from the Forth to the Clyde is being matured.

A LIEUTENANT CASHIERED.

LONDON, 11th September.

Tuesday's *London Gazette* announces that Her Majesty has no further need of the services of Lieutenant Gerard Curtis of the Inniskillings.

THE STRIKE IN LONDON.

LONDON, 11th September.

Mr. E. L. Pemberton, Legal Under Secretary for the Home Department, on behalf of Mr. Henry Mathews, the Home Secretary, replying to a deputation to-day, repeated the statement made by Mr. Mathews on the 27th August, that the Government were not prepared to repress the system of picketing adopted by the strikers without hearing both sides.

LONDON, 11th September.

Cardinal Manning and the Strike Committee had a secret conference of three hours yesterday without any result.

As an instance of how little work is now being done in the dock, it is stated that the average daily cargo discharged in the Albert Dock is but 750 tons.

Australia has sent fourteen thousand pounds to the strike funds, which are decreasing from other sources. Mr. John Burns is indignant at the decrease and denounces what he terms the parsimony of the Americans.

LONDON, 13th September.

Cardinal Manning yesterday had an interview with the dock directors and proposed that the new terms should begin from the 4th of November. He afterwards conferred with the Strike Committee and a mutual reconciliation was the result.

MR. GLADSTONE IN PARIS.

PARIS, 9th September.

Mr. Gladstone, on being interviewed by a reporter from a Fre ch journal, said that he had visited the Paris Exhibition expressly to show his goodwill and respect for France.

THE PARIS EXHIBITION.

LONDON, 11th September.

The Paris Exhibition closes on 31st October.

ILLNESS OF PRINCE BISMARCK.

LONDON, 9th September.

A Berlin telegram states that Prince Bismarck is suffering from inflamed veins.

STILL ANOTHER EAST END HORROR.

LONDON, 10th September.

Another Jack the Ripper murder has been discovered this morning. The unfortunate woman's body was found in a sack lying beneath the railway arch in Whitechapel. The details are more horrible than heretofore, the head and arms having been severed from the body and carried off; great abrasions inflicted on abdomen and disembowelled. The surgical testimony shows the culprit must have possessed considerable surgical skill. A policeman passes the spot every fifteen minutes but saw nothing. A cordon of police has been drawn round the district but no arrests have been made.

LATER.

The murder is now declared not to be the handiwork of Jack the Ripper, but of some person who had killed the woman accidentally in an attempt to procure abortion. The body was then mutilated to throw suspicion on the Whitechapel fiend, and was carried to the place where it was found in Whitechapel and left there. Three similar cases have been recorded in London during the past two years.

THE ANTWERP DISASTER.

ANTWERP, 9th September.

M. Corvillain, the proprietor of the dynamite factory where the explosion occurred, is to be prosecuted for homicide through criminal negligence.

The King of the Belgians spent yesterday visiting the scenes of the disaster.

SUICIDE OF A BANK DIRECTOR.

CONSTANTINOPLE, 11th September.

M. Haas, a Director of the Ottoman Bank here, jumped from the fourth story window of the Bank and was killed on the spot; no reason for the rash act is assigned.

RUSSIA AND GERMANY.

BERLIN, 12th September.

The Czarewitch arrived at Kiel to-day, and thence proceeded to Hanover, where he was met by Emperor William, who gave him a most cordial reception.

THE AMERICAN STORMS.

LONDON, 14th September.

The latest advices from America state that the severe storms on the North Atlantic seaboard continue.

THE COTTON CROP IN AMERICA.

WASHINGTON, 10th September.

The Agricultural Bureau's monthly report states that the average condition of the cotton crop in eleven of the States is 86½ per cent. The crop is backward owing to excessive moisture which retards the development of the bolls. The caterpillar and the boll-worm have done some slight damage to the crop in the States around the Gulf of Florida.

THE BANK OF PERSIA.

LONDON, 13th September.

It is understood here that the Bank of Persia is to be worked under British Royal Charter with a capital of several millions.

NEWS OF STANLEY.

LONDON, 12th September.

Despatches received by the Société Géographique of Brussels report that Stanley has subdued the tribes with which he came in contact east of the Nile, and founded stations of the British East African Company everywhere. He is now well and is marching towards Mombassa. Emin Pacha remained behind.

MR. HERBERT GLADSTONE'S LIBEL ACTION.

BOMBAY, 9th September.

The London correspondent of the *Times of India* writes that Mr. Herbert Gladstone is still determined to proceed against the Anglo-Indian journal which had so grossly libelled him, and the action, which will be conducted by Mr. George Lewis, the well-known London solicitor, will be novel and interesting. The occasions are very rare when public men in this country have sought the protection of the Courts against the strictures or statements of Anglo-Indian journals, even in the days when the good old dashing style of journalism was universal in the Peninsula.

It is now formally stated that the libel on Mr. Herbert Gladstone consists in the publication, on the authority of the newspaper's London correspondent, who is supposed to be a Member of Parliament, of a story that proceedings for divorce implicating Mr. Herbert Gladstone had been stayed by the influence of his father. There is not an atom or grain of truth in the story. It is declared to be a wanton and mischievous invention, and Mr. Lewis has been instructed to deal with the offender without tenderness.

BOMBAY, 10th September.

A correspondent writing to the *Bombay Gazette* mentions the *Morning Post* of Allahabad as the paper containing the libel against Mr. Herbert Gladstone; and to Colonel G. B. Malleson, C. S. I., is attributed the authorship of the paragraph containing the libel.

THE BOMBAY ART EXHIBITION.

BOMBAY, 9th September.

The prospectus of the Bombay Art Exhibition has been issued. It is open to all India. Thirty-seven prizes, including two gold and twelve silver medals, are offered for competition. Five classes are open to professionals.

COMMERCIAL FAILURE.

BOMBAY, 9th September.

A firm of shroffs, established here for the past seventy years, has failed for two lakhs.

THE MILLS IN BOMBAY.

BOMBAY, 13th September.

Between the 1st of October and the 31st of December the mills in Bombay will, it is expected, cease working on two days in the week.

THE ALLEGED OFFICIAL CORRUPTION IN BOMBAY.

BOMBAY, 10th September.

Five out of the six decisions in connection with the alleged bribery cases at Ahmedabad have been reversed on appeal.

THE BANK OF BENGAL.

BOMBAY, 9th September.

Strict enquiries are being made concerning the alleged irregularities at the Bombay branch of the Bank of Bengal.

BOMBAY, 10th September.

A warrant has been granted for the arrest of an employé of the Bombay branch of the Bank of Bengal on a charge of forging two drafts for twenty-five thousand rupees each.

BOMBAY, 11th September.

Relative to the statement that certain irregularities are under investigation at the Bombay branch of the Bank of Bengal, the Manager declares it to be without foundation.

Hewjee, for whose apprehension on a charge of forging two drafts for twenty-five thousand rupees each a warrant has been issued, was not an employé of the Bank, but a merchant. The accused is believed to have disappeared.

THE MAIL SERVICE.

BOMBAY, 10th September.

Dr. Mylne, the Bishop of Bombay, has asked the Sheriff to call a public meeting to protest against the proposed Sunday departure of mails from Bombay.

BOMBAY, 11th September.

The proposal that Sunday should be made the day of departure for the mail from Bombay, has raised the greatest indignation here. A public meeting is to be called to give expression to the feelings of the whole community.

In the Corporation yesterday Europeans, Hindus, Musalmans, Parsees, Jews, all spoke against the proposal as calculated to damage trade as well as the health of the people, by abolishing the Saturday half-holiday and the Sunday rest. A resolution to memorialize Lord Cross was unanimously passed.

This is forcibly seconded by the Volunteers, who declare that the corps will of necessity be broken up, if they lose the Saturday half-holiday which is now devoted to drills.

BOMBAY, 13th September.

Europeans, Hindus, Jews, Musalmans and Parsees sent representatives last night to the preliminary meeting called at the instance of the Hon. Forbes Adam to arrange the preliminaries for a mass meeting convened for next Wednesday to protest against the Sunday departure of mails. Detailed messages were wired to England with a view of obtaining sympathy and support.

COMMERCIAL INTELLIGENCE.

MONDAY, 30th September.

EXPORT CARGOES.

Per steamship *Iravaddy*, sailed on the 26th September:—For Continent—403 bales waste silk, 47 cases silk piece goods, 47 cases essential oil, 200 half-chests tea, and 200 boxes tea. From Foochow, for Continent—1,089 packages tea. For London—255 bales silk, 1 case silk piece goods, and 1 case private effects.

Per steamship *Flintshire*, sailed on the 27th September:—For London—69,825 lbs. Scented Caper tea, 17,556 lbs. Scented Orange Pekoe tea, and 1 package sundries.

OPIUM.

Quotations are:—

New Malwa	$570 per picul, allce. of	2½ catties.
Old Malwa	$600 per picul, allce. of	5 catties.
Older Malwa	$610 per picul, allce. of	5 catties.
Patna (New)	$545 to $547½ per chest.	
Patna (Old)	$528½	" "
Benares (New)	$527½ to $528½	" "
Benares (Old)	$520 to $522½	" "

NOW ON SALE.
IMPERIAL QUARTO.

ENGLISH AND CHINESE DICTIONARY,
WITH THE PUNTI AND MANDARIN PRONUNCIATION.

An Anglo-Chinese Dictionary, published at the *Daily Press* Office, Hongkong.

For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in *extenso*. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications.

To illustrate the vast scope of the work the following facts are submitted for consideration:—Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitherto published.

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate *effectively* with natives who understand nothing but Chinese.—In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it cannot but be invaluable occasionally.

It comprises upwards of two thousand large quarto pages.

4 Vols. Imperial Quarto, Price, $20.

A Large REDUCTION in PRICE is made to Purchasers of SIX or more Copies.
